Is Your Home "Ultra-Safe" ?

If you are using any of the products listed below, you are slowly poisoning yourself and your children. These products contain ingredients which can cause ADD in children, allergies, birth defects and cancer to name a few.

Top 12 Killers

- | | |
|--|--|
|  Bug Killers |  Mold & Mildew Cleaners |
|  Carpet Shampoo |  Oven Cleaners |
|  Ammonia |  Dishwasher Detergent |
|  Drain Cleaner |  Car Care Products |
|  Furniture Polish |  Laundry Products |
|  Bleach |  All Purpose Cleaners |

It may shock you...that according to the National Safety Council, more children under the age of (5) Five...DIE of ACCIDENTAL poisonings at home, than are accidentally killed with guns.

"HOME REMEDIES"

◆ **MILDEW/MOLD** - "I am a Certified Baubiologist and Nutritionist and I specialize in food as medicine. A Baubiologist inspects all of the materials for fungus, mildew, and molds and safe cleanup at new commercial, industrial and residential sites. I have found that both Ultra-Safe Solution® and Ultra-Safe Plus+® removes fungus, mildew and molds...Safely."

"As safe as I have found the Solutions-4-You® products to be, you always have to use any non-toxic product with caution because of the possibility of toxins being released from the materials that you are trying to clean."

**Merilee Nelson,
Certified Baubiologist,
Hunt, TX**

◆ **VETERINARIAN** - "In my clinical practice for the past 23 years, I have used many of the products for treating a variety of disease conditions in animals, primarily dogs and cats. At Grand Laboratories® I recommend to all the Veterinarians that they use either the Solutions-4-Pets® or Ultra-Safe Solution® to bathe the animals instead of toxic shampoos."

"The Solutions-4-Pets® or Ultra-Safe Solution® in a normal full strength 3:1 dilution, has worked wonders on chronic ear infections, even for those unresponsive to traditional treatments, including but not limited to, antibiotics and steroids. Generally within 3 days the infection is under control and within 2 weeks is completely gone."

**Kent J. Trembly, DVM, JD
Larchwood, IA**

IT IS SO
POWERFUL

YET

IT IS SO
GENTLE

According to Sam Dunbarr / O.H.I.® ...IT CAN BE USED...

- | | |
|---------------------------------------|---------------------------------------|
| To degrease your engine | To brush your teeth & shave |
| To clean your oven and stoves | To wash your fruits & vegetables |
| To clean your carpets & floors | To wash & wipe your baby's bottom |
| To remove fleas, head lice & ticks | To bathe & groom cats and dogs |
| To remove fungus, mold & mildew | To spray insects on flowers & plants |
| To polish your automobile & boat | To use as a laundry fabric softener |
| To polish your tile floor & furniture | To clean jewelry, mirrors and windows |

also... for ANY skin problem and much, much more!

◆ **BUGS** - “My family and I use the Solutions-4-You® products around the home and recommend them to others for cleaning, personal hygiene, for soothing minor burns, etc. In Arkansas we have to deal with the extremely poisonous brown recluse spiders. Just one squirt of the Ultra-Safe Solution® full strength 3:1 ready-to-use on a spider and it is dead.”

“The Solutions-4-You® products have some insecticide activity at the recommended cleaning dilutions. We know that the Ultra-Safe Solution® product acts as an emulsifier and that it causes the insects to suffocate from a result of emulsifying their exoskeleton, damaging their breathing apparatus. The fatty acids of the Ultra-Safe Solution® liquid botanical cleanser act as emulsifiers and will kill certain types of other insects in a similar fashion.”

Carl M. Fellend, Ph.D. (retired)
Penn State University Entomologist

◆ **Dental** - “In my clinical practice, I use Ultra-Safe Plus+®, full strength 3:1 ready-to-use, to clean out root canals and 7:1 for disinfecting surfaces in my operatory room for all our patients who are chemically sensitive. I also pre-soak all of my dental instruments at a ratio of 5:1 before sterilization. I recommend to my patients, they use Ultra-Safe Solution® full strength 3:1 for tooth brushing to remove bacteria from their gums that creates gingivitis.”

Darick A Nordstrom, DDS
Hollister, CA

◆ **INSECTS** - “I am a certified organic farmer. Earlier this year I had a heavy infestation of squash bugs on my crop. Using the Ultra-Safe Laundry®, extra light strength 63:1, within a few days all of the squash bugs were completely gone! At the end of our growing season there was no adverse effects or damage of any kind on any of the fruits, trees or vegetables.”

Glenn Austin/Austin Farms
Paonia, CO

◆ **MEDICAL** - “Since becoming a medical doctor in '77, I have used a variety of natural products to heal the body through alternative healthcare instead of prescription drugs. Since being introduced to the Ultra-Safe Solution®, I have used it successfully in my clinical practice for a variety of conditions and/or diseases for my patients, such as:

- Head Lice 2:1 Medium Strength
- Poison Ivy 3:1 Full Strength
- Ring Worm 3:1 Full Strength
- Skin Rashes 7:1 Regular Strength
- Vaginal Infection 31:1 Very Light Strength

Being a medical physician over the past 25 years, with a couple years of general surgery along with my family practice, I specialize in alternative healthcare. Allowing my patients the choice of natural or prescription products, along with Chelation & Wilson Syndrome Therapy. “

Clarence E. Norris, MD
Charlotte, NC

Did You Know...

Prior to the 1970's, Federal Laws REQUIRED the skull and crossbones symbol to be on ALL of the labels of household products that were..... **Dangerous & Deadly!**

More than 7 million accidental poisonings occur each year, with more than 75% involving children under age 6.

—**The Columbia University College of Physicians & Surgeons**

The 2nd highest rate of child poisonings now is ages 9 – 15. Inhaling vapors to “Get High” or “Huffing” toxic household products. Permanent brain damage is often the result.

—**Readers Digest , June 96**

Warning labels required by the U.S. Government EPA; Office of Pesticides and Toxic Substances:

DANGER

Harmful or Fatal if Swallowed

A TASTE to a TEASPOON
Can be **FATAL** to an ADULT

WARNING

Harmful if Swallowed

A TEASPOON to an OUNCE
Can be **FATAL** to an ADULT

CAUTION

Harmful if Swallowed

A OUNCE to a PINT
Can be **FATAL** to an ADULT

If these Small Amounts could be fatal to an adult by Absorption thru the skin, Ingestion or Inhalation, IMAGINE WHAT THEY ARE DOING TO YOUR CHILD!

THE PROBLEM

Cancer rates continue to increase every year since 1970! Brain cancer in children is up 40% in 20 years. Toxic chemicals are largely to blame.

Cancer In Children Rises, NY Times September 29, 1997

New evidence points to a link between environmental poisons and learning disabilities. Chemicals in the environment come under scrutiny as the number of childhood learning problems soar.

Kids at Risk, US News Cover Story June 19, 2000

Feeling ill? It could be your housekeeping habits, according to physicist Philip Dickey, Ph.D., director of the Household Toxics Program, Seattle.

Make a Clean Sweep, Vegetarian Times September 2000

One common ingredient found in most cleaning and personal care products is formaldehyde. Manufacturers are not required to list this toxic chemical as an ingredient. A Material Safety Data Sheet which, by law, must be supplied to anyone who uses any chemical product in the workplace Warns: " Suspected carcinogen; May be fatal if inhaled, swallowed, or absorbed through skin."

Government Material Safety Data Sheet (MSDS)

The National Institute of Occupational Safety and Health analyzed 2,983 chemicals used in personal care products. The final results were as follows:

-  884 of the chemicals were toxic
-  778 caused acute toxicity
-  376 caused skin and eye irritation
-  314 caused biological mutation
-  218 caused reproductive complications
-  148 caused cancerous tumors

WARNING" You Can Not Trust The New Warning Labels!

How To Get Started

I ask you to try the new cleaning products from **SOLUTIONS-4-YOU®!** Our botanical cleansers eliminate all Gram (-) and Gram (+) bacteria which will be beneficial in cleaning businesses, households and industry in a safe hypo-allergenic and non-toxic approach.

Ultra-Safe Plus+® is very unique, it helps to control cross contamination by continuing to work in a microbial action, after it dries, on hard surfaces for up to 1 - 4 weeks. **It Works Wonders on Fungus, Mildew & Mold!**

1. To get started, just call our **Toll-FREE Order Line, (800) 301-9911**, to enroll or place your first order!
2. Please have ALL of your billing, order and shipping information ready. The person answering the telephone will need to have the following to process your order: name, credit card (**Amex, Disc, MC, Visa**), your credit card billing and shipping address with 9 digit zip codes, and a daytime contact telephone number. If desired, provide us your email address for automatic invoicing and shipment notification!!
3. Please have the name of the T.E.A.M.® Member who referred you!!!

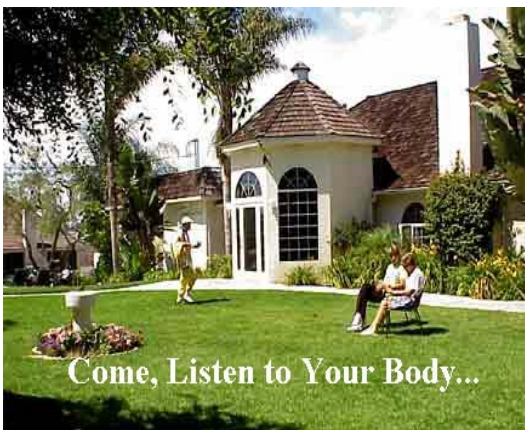

Introducing Solutions-4-You

1- Full Trial Size Package \$79.50 S/H & Ins Included

- Item 1.** 1-16 oz bottle of **Ultra-Safe Solution®** raw concentrate
- Item 2.** 1-16 oz bottle of **Ultra-Safe Laundry®** raw concentrate
- Item 3.** 1-16 oz bottle of **Ultra-Safe Plus+®** raw concentrate
- Item 4.** 1-16 oz bottle of **Ultra-Shield®** raw concentrate
- Item 5.** 1-210ml **Suds Pumps** (Cylinder Style/Filled)
- Item 6.** 4-32 oz mixing bottles with trigger sprayers
- Item 7.** **NATUR-PUR®** 2oz Coral Calcium & 2oz Shea Butter
- Item 8.** 1- 8 oz bottle of **Ear / Paw & Skin - Pet Treatment**
- Item 9.** 1- 8 oz bottle of **Foot-EEZ & Lice-GO-EZE Shampoo**
- Additional Items:** 26 pg Booklet-Is Your Home A Healthy Home?
1 Each - Lets Stop Poisoning Our Children (**Audiocassette & Brochure**)!!

ENDORSEMENTS

HEALTH - "My name is Robert P. Nees, CEO/President of Optimum Health Institute®. We teach holistic health and promote the use of the

Solutions-4-You® products. We use Ultra-Safe Solution® extensively in our kitchen for washing fruits & vegetables, to clean all surfaces, and as a multi-purpose cleanser. The California Health Department has approved the use of the Solutions-4-You® products. We provide for our guests, both the Ultra-Safe Solution® and Ultra-Safe Laundry® for their use during their stay and have had very positive feedbacks from them."

"My wife, Pam, a Registered Nurse and Instructor at the institute, is using the product called Ultra-Safe Plus+® as a multi-purpose commercial cleanser and SAFE germicidal at the institute and in our home."

**Robert P. Nees, CEO, President
Optimum Health Institute**

All proceeds from OHI® sales of Solutions-4-You® products go to the Optimum Health Institute®—A Non-Profit Church Organization.

THE SOLUTION

Colloidal micelle technology, a new approach in the field of organic chemistry, was discovered during the early 1980's by environmental conscious scientists. With minor modifications the basic technology can produce an impressive variety of poison-free, environmentally friendly products. Products created by this, new technology can potentially replace millions of tons of toxic chemicals such as household, industrial and marine cleaners; agricultural applications including pesticide treatments; personal hygiene products such as acne preparations and lice shampoo, automobile, motorcycle and boat maintenance products; pet care products such as flea dip and flea shampoo; and insect repellents.

The colloidal micelles in all of the **SOLUTIONS-4-YOU.COM®** products are composed of natural organic ingredients. The word "organic" as it is used here means both "carbon-based" and "naturally in nature, not harmful to living systems." The word "colloidal" pertains to the ability of tiny particles to remain suspended in a solution. And the word "micelle" means "cell that emulsifies." We believe that this is the first time micelle technology has been achieved with the use of natural ingredients that are completely safe for the environment, humans and pets.

In micelle technology, molecules create a field similar in some respects to a magnetic field. However, the molecular attraction induced by the microscopic micelles is not the attraction occurring in a magnetic field between opposite poles (positive and negative). Instead, the molecular micelle attraction occurs between like poles (positive and positive, and negative and negative). Each micelle molecule has a hydrophilic (water-seeking, negative pole) and a hydrophobic (water-repelling, positive pole). The hydrophilic poles attract each other and form the interior of the micelle. The hydrophilic poles attract each other and form a circular, tough outer surface. When a single micelle molecule comes in contact with a heavy hydrocarbon molecule—in other words, oil or grease, which is always hydrophobic - the hydrophobic center of the micelle molecule and bonds to the hydrocarbon molecule, thus trapping it inside itself. In this way, the heavy hydrocarbons are pulled away from the original surface to which they were attracted (cloth, wood, metal, skin, etc) and into the center of the micelle. The oil or grease remains permanently trapped inside the micelle molecule and is simply washed away with water.

**LARRY WAYNE HARRIS, (Ph.D.) (RM)
REGISTERED MICROBIOLOGIST (A.A.M.) & (N.R.M.) 3053**

SOLUTIONS-4-YOU® products have been laboratory tested to be bactericidal on all Gram (-) negative bacteria, members of the Enterobacteriaceae family. (Citrobacter, Edwardsiella, Enterobacter, Wscherichai coli, Hafnia alvei, Klebsiella, Morganella, Proteus, Providencia, Salmonella, Serratia, Shigella), and bactericidal on all Gram (+) positive bacteria, members of the Micrococcaceae family. (Micrococci, Staph, Strep, Micrococci, Staphylococci, Stomatococci), and should be effectively killed with these solutions at a RTU (Ready-To-Use) full-strength, 3:1, dilution ratio.

Control of Microbial Growth

Specific control measures can be used to kill or inhibit the growth of microorganisms. A procedure which leads to the death of cells is broadly termed cidal, whereas, a procedure which only inhibits growth is termed static. If the organism that is being killed are a bacterium, the term used is bactericidal. Cidal measures are used when it is important that living microorganism be completely eliminated. Static measures are used when the organisms need not be killed but when their growth must be slowed or stopped.

Many chemicals are used to control microbial growth. The modes of action of growth-controlling chemicals vary, but the most common actions are disruption of cell membranes or interference with nucleic acid or protein synthesis. Some of the most commonly used chemicals are classified as antibiotic, antiseptics, or disinfectants. Antiseptics are chemicals, which kill or inhibit growth of microorganisms and are safe to use on animal and human tissue. Antiseptics may be used to treat wounds or as mouth washes. Disinfectants are chemicals which are able to kill microorganisms, are not safe to use on animal or human tissue. Solutions-4-You® formula's mode of action appears to disrupt cell membranes which would normally be classified as an "antiseptic." Since our formulas do not contain antibiotics, antiseptics or disinfectants they are not labeled antiseptic.

NO Antibiotic Resistance Should Develop

(W.W.C.R.) World Wide Christian Radio

On Monday night 10/15/01 & 10/22/01 Larry Wayne Harris, (Ph.D.) (RM), Registered Microbiologist (A.A.M.) & (N.R.M.) 3053, was the guest speaker on (W.W.C.R.) the World Wide Christian Radio. As part of a common sense, first line of defense against Anthrax, Biological and Chemical Warfare attacks, he suggested that every person should have an ample supply of Ultra-Safe Plus+ ® and Ultra-Safe Solution® on hand in their car, at home and work to use as a body wash in case of exposure.

Mr. Harris was quoted..."the use of Solutions-4-You® products will help to make this a better, healthier and much safer planet on which to live." Also, Mr. Harris highly recommended all of our products from **SOLUTIONS-4-YOU®**.

RESEARCH OF JOHN E. BARTON, CEO @ BIO-DATA, LLC®

My business for the past 35 years has been researching and testing products such as cleaners, foods and water to evaluate which products are the safest for consumers to use. We have recently tested several soaps in the market place, one of which was **Solutions-4-You** Products. We were very impressed with the results. Their products tested exceptionally well and should be very outstanding for the average consumer. This is really uncommon for soaps.

Below are results from our recent product tests. Under this particular scaling system if a product tests in the negative numbers it indicates that the product can be harmful for the user. The closer it gets to zero, the less effective it is for the human body. The higher the number on the scale, the more helpful and safer it is to the human body. These tests do not test a products' ability to act as a soap. It is a test on its ability to be compatible with humans in eliminating pathogens or harmful bacteria.

Example: Chlorine kills germs, but it may also kill humans. Here at Bio-Data® user safety is our first concern for our clients and employees, a great many of whom are chemically sensitive. **We highly recommend using Solutions-4-You®.**
